DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Wright et al. (<u>Transportation Engineering Planning and Design</u>, 1989). As discussed by Wright et al., the steps as claimed are standard practice in transportation design.

Regarding limitations of road, floating road, bridge, etc., all are within the scope of the of the discussion of Wright et al. and inherent to use in certain design situations. Further, note that the term "area" has not been given any particular patentable weight since an area could be of any dimension. Also note that the limitations regarding proximity to water are inherent in many design applications, and are within the scope of "environmental" considerations discussed by Wright et al.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references teach road and bridge structures and designs.
